The Group's BOD also shares the responsibility with the ERMG in promoting the risk awareness program enterprise-wide. The ERM framework revolves around the following eight interrelated risk management approaches:</p> <p>1. Internal Environmental Scanning – it involves the review of the overall prevailing risk profile of the business unit to determine how risks are viewed and addressed by management. Objective Setting – the Group’s BOD mandates the Group’s management to set the overall annual targets through strategic planning activities, in order to ensure that management has a process in place to set objectives which are aligned with the Group’s goals.</p> <p>3. Risk Assessment – the identified risks are analyzed relative to the probability and severity of potential loss which serves as a basis for determining how the risks should be managed. The risks are further assessed as to which risks are controllable and uncontrollable, risks that require management’s attention, and risks which may materially weaken the Group’s earnings and capital.</p> <p>4. Risk Response – the Group’s BOD, through the oversight role of the ERMG, approves the Group’s responses to mitigate risks, either to avoid, self-insure, reduce, transfer or share risk.</p> <p>5. Control Activities – policies and procedures are established and approved by the Group’s BOD and implemented to ensure that the risk responses are effectively carried out enterprise-wide.</p> <p>6. Information and Communication – relevant risk management information are identified, captured and communicated in form and substance that enable all personnel to perform their risk management roles.</p> <p>7. Monitoring – the ERMG, Internal Audit Group, Compliance Office and Business Assessment Team constantly monitor the management of risks through risk limits, audit reviews, compliance checks, revalidation of risk strategies and performance reviews.</p>
